Data Science graduate and **AI & Automation Engineer** building **agentic workflows, AI agents, and automation systems** for production. Seeking **AI Automation, AI Engineering, or Associate Data Science roles**.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript (Node.js), TypeScript, HTML/CSS
AI & Agents: Agentic Workflows, RAG, OpenAI API, MCP, Prompt Engineering, FAISS, SentenceTransformers, Voice AI (Retell, Vapi)
Automation: n8n, Make.com, Zapier, Playwright, Selenium, Apify, Twilio, Twenty CRM, Airtable
Web, Data & Cloud: Next.js, React, Flask, PostgreSQL, MySQL, Vercel, GitHub Actions, Docker, Railway

WORK EXPERIENCE

Automation & AI Engineer | Buildberg.co *January 2026 – Present*
Automation & AI Engineer | Techionik.ltd *October 2025 – January 2026*

PROJECTS

IdeoLab - AI Automation Platform *October 2026*

- Built the IdeoLab and Strategic Marketer marketing websites and 4+ other sites, workflow templates (incl. 3 Vapi voice agents) and 60+ skills for the platform's AI site builder.
- Built a Node.js blog engine that researches, writes, QA-checks, illustrates and publishes 2 SEO articles per site daily.
- **Technologies:** Node.js, Next.js, TypeScript, OpenAI API, DataForSEO, Vapi, Twilio, GitHub Actions, Vercel.

Competitor Price Intelligence Platform *October 2026*

- Built an automated scraping system for 150+ competitor stores that runs daily on a schedule, collecting about 6 million product listings into an append-only PostgreSQL price history that logs price changes, restocks, new and removed products.
- Developed a Next.js dashboard with Google sign-in, charts, filters, CSV exports, automated price QA against live stores, and an MCP endpoint that lets AI assistants query the data.
- **Technologies:** Python, Playwright, PostgreSQL, Railway, GitHub Actions, n8n, Next.js, React, TypeScript, Clerk, Vercel, MCP.

Blog & Social Media Automation Engine *October 2026*

- Built an end-to-end automated content pipeline spanning SEO research, AI-driven writing, image generation, and scheduled publishing - eliminating manual blog production work.
- Extended it with two Make.com agents that turn every published article into ready-to-post captions and AI-generated images for 4 social platforms, plus a ready-to-send email draft, all linked by Post ID.
- **Technologies:** n8n, Make.com, OpenAI, Claude, Kie.ai, Google Sheets, Serper, Tavily, WordPress.

AI-Powered Multimodal Plumbing Service Ecosystem *April 2026*

- Built a dual-agent AI system (Retell voice + WhatsApp) that handles plumbing leads end to end from text, voice notes and photos, using a RAG pipeline (OpenAI Vision/Whisper, Supabase Vector) to match leads in Twenty CRM and book jobs via Cal.com.

GoHighLevel AI Lead Nurture System *November 2026*

- Delivered a GoHighLevel setup for a US advertising agency: a 35-email lead nurture campaign, a dedicated sending domain and a booking calendar with automated confirmations and reminders.
- Built two AI agents sharing one knowledge base: an email agent that answers lead replies within minutes and follows up with quiet leads, and a website chatbot that answers visitors and captures them as contacts.
- **Technologies:** GoHighLevel (Workflows, Conversation AI, Calendars), GoHighLevel API, Python, DNS.

High-Scale Lead Engagement & Deliverability Engine *December 2025*

- Engineered a robust 3-tier automation engine for high-volume outreach, prioritizing inbox deliverability over raw send speed to maximize campaign ROI.
- Safeguarded sender reputation by integrating the ZeroBounce API for multi-stage email validation and maintaining global suppression lists across campaigns.
- **Technologies:** n8n, JavaScript, Microsoft Graph API, Google Cloud, ZeroBounce, Cal.com, Railway.

EDUCATION

Bachelor of Data Science *December 2021 – September 2025*
GIFT University, Gujranwala
